

## **Instruction to upgrade Software(Firmware) for Sagemcom F2704 router:**

1. Connect the Ethernet Cable from the router to your computer.
2. Open Internet Explorer, Type 192.168.1.1 on the address bar and then press enter.
3. It will prompt for the login username and password.  
Username: admin  
Password: admin
4. Click on the "Management" -> "Update Software" -> "Choose File".  
Click on the "Choose File" button to specify the path of the Software file downloaded in your computer.
5. Click on the "Update Software" button. Wait for some time, while software is successfully upgraded on your router.

The screenshot shows a web browser window with the address bar set to 192.168.1.1. The page title is "DSL Router". The header features the "etisalat" logo and a status bar with indicators for ADSL, Downstream, Upstream, and Adsl Down. A navigation menu on the left includes options like Device Info, Internet Connection, and Management. The main content area is titled "Tools -- Update Software" and contains three steps: Step 1: Obtain an updated software image file from your ISP. Step 2: Enter the path to the image file location in the box below or click the "Browse" button to locate the image file. Step 3: Click the "Update Software" button once to upload the new image file. A note states: "NOTE: The update process takes about 2 minutes to complete, and your DSL Router will reboot." Below the text, there is a "Choose File" button and the text "No file chosen". An "Update Software" button is located at the bottom right of the main content area. The footer contains the copyright notice: "© 2005-2012 SAGEMCOM Corporation. All rights reserved."
